

Tom's Kadett

Tom Wallis's 1970 Kadett Rallye

I bought my 1970 Kadett Rallye in 2010. It had a replacement engine in it but also came with the original 1.9L engine and transmission. I had concerns about the replacement motor so I rebuilt the original and swapped engines. Front and rear springs, all bushings, ball joints, and tie rods were replaced by me and my brother Tim.

The car is a real treat to drive and I can't take it anywhere without getting thumbs up. I hope to have the interior and paint finished in 2017.
